BHAVIK MITHAIWALA

bhavik.mithaiwala90@gmail.com • +1 (263)-882-0900 • Ottawa, ON LinkedIn

PROFESSIONAL SUMMARY

Full-Stack Developer experienced in building scalable applications using React, Angular, Node.js, TypeScript, and JavaScript. Skilled in responsive user interfaces, RESTful APIs, microservices, secure authentication, database integrations, and AI-powered workflows. Experience with software design and development, performance optimization, debugging, automated testing, CI/CD pipelines, and Agile development, focused on delivering reliable solutions to business problems. Adaptable and detail-oriented, with a passion for exploring emerging technologies, learning new tools, adapting to challenges, and collaborating across the software development lifecycle.

WORK EXPERIENCE

Full-Stack Developer | *ShareCharge* *Sep 2025 – Present*

- Built a peer-to-peer EV charging marketplace using React.js, React Native, TypeScript, and Node.js, developing responsive web and mobile interfaces with reusable components and state management, charger discovery, real-time booking management, RESTful APIs, and WebSocket-based updates with Socket.IO.
- Developed scalable Node.js and Express.js backend services with MongoDB for user registration, secure authentication, transactions, and payments, integrating Stripe and Wise APIs to support payment processing, payouts, and financial operations while maintaining secure sessions and reliable API integrations.
- Improved performance and reliability through React and Node.js troubleshooting, API optimization, access controls, automated testing, code reviews, and CI/CD pipelines, while developing an AI-powered agentic workflow to automate manual charger approvals and streamline operational processes.

Application Developer | *L&T Technology Services* *Jan 2024 – Apr 2024*

- Designed and developed an On-Premises Access Request Application using React.js and Node.js, implementing user interfaces, RESTful APIs, secure authentication, and role-based access control (RBAC) to streamline employee onboarding, automate access management, and support business operations.
- Developed a multi-step approval workflow with SQL-backed data management and API integrations, improving frontend performance, Resolving application defects, and maintaining secure data handling while following security standards, access control policies, and coding best practices throughout the development lifecycle.

Web Developer | *Jemistry Info Solutions LLP* *May 2022 – Jun 2022*

- Developed a tourism and vacation booking platform using AngularJS, JavaScript, HTML5, CSS3, and RESTful APIs, building responsive interfaces, reusable UI components, and interactive features with backend integrations and cross-browser compatibility, supporting intuitive navigation and booking workflows.
- Improved performance through debugging, API troubleshooting, and cross-browser fixes, while implementing secure payment integrations, supporting deployments, and maintaining reusable frontend code.

TECHNICAL SKILLS

- **Languages & Stack:** JavaScript (ES6+), TypeScript, Python, Java, React.js, AngularJS, Node.js
- **Frontend & Mobile:** React Native, React Hooks, Redux, HTML5, CSS3, Tailwind CSS, Responsive Design
- **Backend & APIs:** Express.js, RESTful APIs, WebSockets, Socket.IO, Authentication, Authorization, RBAC
- **Databases:** PostgreSQL, MySQL, MongoDB, SQL
- **Cloud & DevOps:** Docker, CI/CD Pipelines, Git, GitHub, Cloud Infrastructure
- **Testing & Quality:** Jest, React Testing Library, Cypress, Unit Testing, Debugging, Code Reviews
- **Architecture & Practices:** Microservices, Agile/Scrum, SDLC, Secure Coding, Technical Documentation

EDUCATION

Master of Engineering in Computer Engineering | *University of Guelph* *Sep 2024 – Sep 2025*

Grade: 80.33%

Relevant Coursework: Programming for MEng, Information Retrieval, Introduction to Artificial Intelligence

Technical Knowledge: Artificial Intelligence Fundamentals, Information Retrieval Systems, Search Algorithms, Data Processing, Programming Techniques, Algorithmic Problem-Solving, Software Design, Data Analysis

Bachelor of Technology in Computer Engineering | *Charusat University* *Jun 2020 – Apr 2024*

GPA: 8.51/10.00

Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Software Engineering, Object-Oriented Programming, Operating Systems, Advanced Web Technologies

Academic Focus: Algorithm Design, Relational Database Design, Object-Oriented Design, Web Application Development

PROJECTS

StockFlow – Inventory & Order Management
Angular, TypeScript, Node.js, Express.js, MongoDB

- Developing a full-stack inventory management application with Angular and Node.js, supporting product management, order processing, stock tracking, RESTful APIs, and MongoDB integration for reliable inventory operations, with secure data handling, efficient workflows, and validation.
- Implementing stock validation, role-based access control, low-stock alerts, and inventory movement history, with server-side checks to prevent insufficient-stock orders and maintain data consistency during concurrent updates.

EventHub – Event Registration Platform
React.js, TypeScript, Node.js, Express.js, PostgreSQL

- Building a full-stack event registration platform using React.js and Node.js, supporting event creation, attendee registration, booking management, and RESTful API integration with PostgreSQL for persistent storage.
- Developing capacity validation, cancellation workflows, and automated waitlist management, with database transactions to prevent duplicate registrations, avoid overbooking, and maintain consistent booking records.

SpendWise – Personal Finance Tracker
React.js, TypeScript, Node.js, Express.js, SQLite

- Developing a personal finance tracking application using React.js and Node.js, featuring income and expense management, category-based budgets, RESTful APIs, and interactive dashboards for monthly reporting.
- Implementing CSV transaction imports, duplicate detection, input validation, and automated budget alerts, with accurate currency calculations and database-backed reporting to maintain reliable financial records and spending summaries.

INTERESTS & DEVELOPMENT

Interests: Interested in backend development, system design, and performance optimization, with a focus on exploring Java, Spring Boot, and PostgreSQL. Regularly practices coding challenges on LeetCode to strengthen data structures, algorithms, and problem-solving skills.

Soft Skills: Strong analytical thinking, problem-solving, and communication skills. Adaptable, detail-oriented, and eager to learn new technologies. Comfortable collaborating in Agile teams, reviewing code, troubleshooting technical challenges, and delivering reliable software solutions.
